

Dr. Jeri Sullivan Graham
Senior scientist, Los Alamos National Laboratory

Graham is a hydrogeologist and geochemist with 30 years of experience in environmental chemistry, ground-water hydrology, water treatment, systems modeling and field studies. She has developed considerable expertise in produced water chemistry and treatment over the last 15 years of her research. Graham currently is a science advisor to Secretary David Martin of the New Mexico Energy, Minerals and Natural Resources Department and is the coordinator for the Brackish Water working group under the New Mexico Governor's Drought Task Force. She is a certified professional geologist, and holds a bachelor's degree in chemistry from the University of Virginia, a master's degree in geochemistry from the University of North Carolina at Chapel Hill, and a doctorate in earth and environmental science from New Mexico Tech.
