Agriculture Odor Management

This Act addresses odor management from agriculture (animal) operations. It provides for regulations concerning construction of animal waste facilities in order to manage animal agriculture odor. It also gives first-time violators the opportunity to work through the problem rather than fines.

It is the intent of this Act to manage animal odors when they are generated at a level in excess of those odors normally associated with accepted agricultural practices. It authorizes the state department of agriculture as the lead agency to administer and implement the provisions and to ensure that any requirements imposed upon agricultural operations are cost-effective and economically, environmentally and technologically feasible.

The design and construction of new or modified liquid waste systems are to be done by licensed professional engineers, approved by the director of the department of agriculture and constructed in accordance with the state department of environmental quality standards.

The draft provides opportunities for first-time violators to work with the state department of agriculture to develop and implement odor management plans. It maintains confidentiality of any reports or records, specifies the format for filing complaints, and stipulates penalties for subsequent violations. It also creates an Agriculture Odor Management Fund to provide money for research, grants, and projects dealing with agriculture animal odor.

Idaho
Title 25, Chapter 3801-3809
Status: Enacted into law in 2002.

Suggested State Legislation

(Title, enacting clause, etc.)

Section 1. [Short Title.] This Act may be cited as “The Agriculture Odor Management Act.”

Section 2. [Legislative Findings.]
(1) The agriculture industry is a vital component of this state’s economy and during the normal course of producing the food and fiber required by this state and our nation, odors are generated. It is the intent of the [legislature] to manage these odors when they are generated at a level in excess of those odors normally associated with accepted agricultural practices in this state.

(2) The [state department of agriculture] is hereby authorized as the lead agency to administer and implement the provisions of this Act. In carrying out the provisions of this Act, [the department] will make reasonable efforts to ensure that any requirements imposed upon agricultural operations are cost-effective and economically, environmentally, and technologically feasible.

Section 3. [Authority and Duties of the Director Concerning Odors from Agricultural Operations.] The [director of the department of agriculture] is authorized to regulate odors from agricultural operations. In order to carry out its duties pursuant to the provisions of this Act, the
[director of the department] shall be authorized to promulgate necessary administrative rules in compliance with [insert citation].

Section 4. [Definitions.] When used in this Act:

1. “Accepted agricultural practices” means those management practices normally associated with agriculture, and which should include management practices intended to control odor generated by an agricultural operation.

2. “Agricultural animals” means those animals including, but not limited to, mink, domestic cervidae, horses, and ratites raised for agricultural purposes.

3. “Agricultural operations” means those operations where livestock or other agricultural animals are raised, or crops are grown, for commercial purposes, not to include those operations set forth within [insert citation].

4. “Best management practices” means practices, techniques or measures which are determined by the [department] to be a cost-effective and practicable means of managing odors generated on an agricultural operation to a level associated with accepted agricultural practices.

5. “Department” means the [state department of agriculture].

6. “Director” means the [director of the state department of agriculture].

7. “Liquid waste system” means those wastewater storage and containment facilities and associated waste collection and conveyance systems where water is used as the primary carrier of manure and manure is added to the wastewater storage and containment facilities on a regular basis including the final distribution system.

9. “Manure” means animal excrement that may also contain bedding, spilled feed or soil.

10. “Modified” means structural changes and alterations to the livestock operation which would require increased wastewater storage or containment capacity or such changes which would increase the amount of manure entering wastewater storage containment facilities.

11. “Nutrient management plan” means a plan prepared in conformance with the nutrient management standard.

12. “Nutrient management standard” means the 1999 publication by The United States Department Of Agriculture, Natural Resources Conservation Service, Conservation Practice Standard, Nutrient Management Code 590, and all subsequent amendments, additions or other revisions thereto, or other equally protective standard approved by the [director].

13. “Odor” means the property or quality of a substance that stimulates or is perceived by the sense of smell, or by other means as the department may determine by rule, the standards for which shall be judged on criteria that shall include intensity, duration, frequency, offensiveness, and health risks.

14. “Odor management plan” means a site-specific plan approved by the [director] to manage odor from an agricultural operation to a level associated with accepted agricultural practices by utilizing best management practices.

15. “Person” means any individual, association, partnership, firm, joint stock company, joint venture, trust, estate, private corporation, or any legal entity, which is recognized by law as the subject of rights and duties.

16. “Wastewater” means water containing manure which is generated on a livestock operation.

17. “Wastewater storage and containment facilities” means wastewater storage ponds, wastewater treatment lagoons and evaporative ponds.
Section 5. [Design and Construction.] All new or modified liquid waste systems shall be designed by licensed professional engineers, approved by the [director of the department of agriculture] for compliance with the provisions of this Act, and constructed in accordance with standards and specifications either approved by the [director for management of odors] or in accordance with any existing relevant memorandums of understanding with the [state department of environmental quality], provided however, that all persons shall submit plans and specifications for new or modified liquid waste systems to the director for approval and shall not begin construction of a liquid waste system prior to approval of plans and specifications by the [director]. If construction is commenced prior to receiving necessary approval, the [director] may order construction activities to be ceased. No material deviation shall be made from the approved plans and specifications without the prior written approval of the [director]. Within [thirty (30) days] of completion of construction, alteration or modification of any new or modified liquid waste system, complete and accurate plans and specifications depicting the actual construction, alteration or modification performed must be submitted by the operator to the [director]. If construction does not materially deviate from the plans approved by the director, a statement to that effect shall be filed by the agricultural operation with the [director].

Section 6. [First-Time Violators, Odor Management Plan, Exceptions.]

(1) If it is determined by the [department] that an agricultural operation, not to include those operations set forth within [insert citation], is generating odors in excess of levels associated with accepted agricultural practices, the agricultural operation shall be deemed to have committed a first-time violation of the provisions of this Act, provided that the agricultural operation has never been determined by the [department] to have committed a prior violation of the provisions of this Act. The [department] shall provide the owner or operator of the agricultural operation with written notice of the violation and an opportunity for a hearing pursuant to the [state administrative procedure act].

(2) The [department] shall require any agricultural operation determined to have committed a first-time violation of the provisions of this Act to cooperate with the [department] and to develop and submit an odor management plan to the [director] for approval.

(3) All odor management plans shall be in writing and signed by the [director of the department of agriculture] and the owner or operator of the agricultural operation. Odor management plans shall designate a period of time in which the agricultural operation will be in full compliance with the plan and shall provide for periodic review by the [department], no less than annually, for a period of [three (3) years] from the date of the plan. Failure to comply with the odor management plan shall constitute a subsequent violation of the provisions of this Act.

(4) All approved odor management plans shall be implemented as approved by the [director].

(5) If, after a reasonable period of time as determined by the [department], an approved odor management plan does not reduce odor to a level associated with accepted agricultural practices, the [department] shall review the plan with the owner or operator of the agricultural operation and adjust the plan to meet the goals of this Act.

(6) Odor management plans shall be designed to work in conjunction with any required nutrient management plans.

(7) An odor emission caused by an act of God or a mechanical failure shall not constitute a violation of this Act provided that the agricultural operation from which the odor emission is emanating takes reasonable steps to promptly repair the cause of the emission.

Section 7. [Inspections -- Records Confidential.] The [director or his designee] is authorized to enter and inspect any agricultural operation and have access to or copy any facility

25 2004 Suggested State Legislation
records deemed necessary to ensure compliance with the provisions of this Act or required odor
management plans. Prior to conducting an investigation, the [department] shall notify the board
of county commissioners for the county in which the agricultural operation is located and the
board of county commissioners may have a designee accompany the [director or his designee]
during the inspection. All records copied or obtained by the [director or his designee] as a result
of an inspection pursuant to this section shall be confidential private records and shall be exempt
from disclosure under [insert citation] except:
   (1) Records otherwise deemed to be public records not exempt from disclosure pursuant
to [insert citation]; and
   (2) Inspection reports, determinations of compliance or noncompliance and all other
records created by the [director or his designee] pursuant to this section.

Section 8. [Complaints.] The [department] shall respond to all odor complaints lodged
against agriculture operations. A complaint must include the name, address and telephone
number of the complainant. The response of the [department] may be limited to informing the
complainant that an odor plan is being implemented. Complaints pursuant to this section are a
public record open to public inspection and copying pursuant to [insert citation].

Section 9. [Subsequent Violations -- Penalties.]
   (1) An agricultural operation, after having been determined to have committed a first-
time violation of the provisions of this Act, shall be deemed to have committed a subsequent
violation if the operation:
      (a) Is determined by the [department] to have committed a subsequent violation
within a [three (3) year] period of time; or
      (b) Failed to comply with an odor management plan developed pursuant to
[insert citation].
   (2) An agricultural operation, after having been determined to have committed a first-
time violation of the provisions of this Act, may be deemed to have committed a subsequent
violation if the [director] determines that the operation has failed to cooperate by failing to
submit an acceptable odor management plan.
   (3) Those agricultural operations determined to have committed a subsequent violation
of this Act shall be assessed a civil penalty by the [department] or its duly authorized agent not
to exceed [ten thousand dollars ($10,000)] for each offense and be liable for reasonable
attorney’s fees and costs.
   (4) Assessment of a civil penalty as provided herein may be made in conjunction with
any other [department] administrative action and shall be based on the severity of the offense
and the degree of cooperation with the [department].
   (5) No civil penalty may be imposed unless the person charged was given notice and
opportunity for a hearing pursuant to the [state administrative procedure act].
   (6) If the [department] is unable to collect the civil penalty or if any person fails to pay
all or a set portion of a civil penalty as determined by the [department], the [department] may
recover such amount by action in the appropriate court.
   (7) Any person against whom the [department] has assessed a civil penalty under this
section may, within [thirty (30) days] of the final action making the assessment, appeal the
assessment to the [district court of the county in which the violation is alleged] by the
[department] to have occurred.
   (8) Money collected for violations shall be deposited in the [state treasury] and credited
to the [general fund].
(9) The imposition or computation of monetary penalties shall take into account the seriousness of the violation, and such other matters as justice requires. The [director] shall prepare a written report setting forth the basis upon which any monetary penalty is imposed and/or computed and shall retain the report on file with the [department].

Section 10. [Agriculture Odor Management Fund.] There is hereby created in the [state treasury] a fund to be known as the [Agriculture Odor Management Fund], which shall consist of all money that may be appropriated to it by the [legislature] or made available to it from federal, private or other sources. The [department] may expend such amounts as are appropriated by the [legislature] from the fund for research, grants, projects, programs or other expenditures.

Section 11. [Severability.] [Insert severability clause.]

Section 12. [Repealer.] [Insert repealer clause.]

Section 13. [Effective Date.] [Insert effective date.]
